REQUEST FOR PROPOSAL (RFP)

Project Name: 6820 Shingle Creek Pkwy, Minneapolis, MN 55430

PART 1 - INVITATION TO BID

On behalf of the owner: [GKI Industrial Minneapolis]; Maverick Management Group, LLC (MMG) is hereby soliciting proposals for roofing services to be performed relating to 6820 Shingle Creek Pkwy, Minneapolis, MN 55430.

General roof work includes:

- 6820 Shingle Creek Pkwy, Minneapolis, MN 55430 approximately 146,000 SF;
- The roofing contractor shall be responsible for providing a smooth acceptable surface for the proper installation of the roof insulation, membrane, and specified components on all new construction projects.
- The roofing contractor shall be responsible for the inspection of the deck surface as to suitability for roofing and notify the owner of any defects that require correction prior to roof application.
- The roofing contractor shall be responsible for the removal of all loose aggregate (gravel, or other material) by power broom and/or vacuuming.
- Examine surfaces for inadequate anchorage, low areas that will not drain properly, foreign material, ice, wet insulation, and unevenness or any other defect which would prevent the execution and quality application of the new roofing.
- Clean all vents, pipes, conduits, walls and stacks to bare metal. All protrusions must be properly secured to the roof deck. Remove and properly discard all lead, pipe and drain flashings. Flash all penetrations accordance with manufacturer recommendations.
- Pick of old abandoned HVAC equipment identified by owner.
- Bidder is to perform due diligence and suggest in the proposal the removal and installation plans in accordance with the existing roof condition at job walk and codes and standards.
- Furnish and install all construction materials per national, state or local codes and standards.
- Install roofing materials in accordance with manufacturers recommendations.
- Any/all mechanical and/or electrical work necessary to complete the project shall be included in the bid.
- Provide 20-year NDL manufacturer labor and material warranty. Provide copies of manufacturer warranty. Warranty to be transferable at no cost to owner.
- Provide 2-year contractor's workmanship warranty and an alternate to extend the workmanship warranty to match up duration of manufacturer warranty. Provide copies of workmanship warranty. Warranty to be transferable at no cost to owner.
- Provide all manufacturer field testing reports.

System

Option A	All areas	146,000	60 Mil TPO RhinoBond
Option B	All areas	146,000	60 Mil TPO Mech Fastened

Figure 1-6820 Shingle Creek Pkwy, Minneapolis, MN 55430

1.01 Basic Scope of Work – 60mil TPO RhinoBond–20-Year Warranty

- Coordination throughout the project with Owner, Tenant, Fire Alarm vendor (if applicable), HVAC vendor (if applicable), Electrical vendor (if applicable), and Interior Protection subcontractor (if applicable).
- Coordinate with property manager, tenants and owner on phasing and sequencing, staging, storage and material deliveries.
- Assist HVAC vendor safe off HVAC units and reinstall HVAC units after finishing the roof (if applicable).
- Assist electrical vendor safe off roof top units and conduits and reinstall roof top units and conduits after finishing the roof (if applicable).
- Remove and dispose of existing loose ballast stone by means of industrial scraper, industrial roof vacuum or mechanical sweeper.
- Perform an infrared scan of the entire roof section to identify areas of wet insulation.
- Remove all locations of wet insulation and infill with polyisocyanurate insulation to match the height of existing roof system. Provide unit price as an alternate.
- Remove and dispose of the sheet metal from perimeters and membrane flashings from all vertical surfaces.
- Repair the current roof system as needed.
- Install one layer of 1" ISO over the prepared existing roof, fastened with RhinoBond fasteners and plates to the existing metal deck, per manufacturer specification.

- Roofing system shall be installed per manufacturer or engineer assembly. Meet wind uplift rate
- Tapered insulation sumps and crickets will be installed at high side of roof curbs and between the drainage areas to enhance water flow off the roof system.
- Install a 60 Mil TPO membrane over the new 1" ISO, welded to the RhinoBond plates with bonding toll. Weighted cooling magnets are placed over the bonded membrane/plates. Per manufacturer recommendation and specification.
- Extend TPO over parapets and flash parapets up and over.(If applicable)
- Install TPO walkway pads at the roof hatch and major roof top units. 4 ways at major units.
- Install new drain assemblies at original drain locations. Install new lead flashings at roof drains.
- Install new prefabricated 24ga Kynar finished edge metal to include new coping cap with necessary wood blocking, scuppers, drip edge, coping cap, fascia, and counter flashing.
- TPO wall flashings on all vertical surfaces.
- Flash all curbs and penetrations and install new terminations.
- Seal all plumbing penetrations.
- Clean work-related areas and haul away debris.
- Paint all gas lines safety yellow.
- Prime all rusted hatches and curb caps
- Install OMG pipe guards or similar to all existing condensation, electrical and gas lines. Contractor to confirm the height of the existing lines to choose the size of pipe guard accordingly.
- If necessary, extend stack vent height to meet plumbing state and local codes, standards, and requirements, due to change of roof layers.
- Extend RTU condensate lines to drain or gutter system
- Pull tests and/or adhesive tests needs to be conducted by manufacturers pre construction and before close-out.
- Interior protection using plastic barriers on major equipment in tenant's space, coordination with tenants and watch from underneath during fastening process. Clean up debris in tenant's space due to fastening.
- Provide 20-year NDL manufacturer labor and material warranty. Provide copies of manufacturer warranty. Warranty to be transferable at no cost to owner.
- Provide 2-year contractor's workmanship warranty
- Deliver new roof in blemish free condition. Methods including but not limited to final cleanup, chemical cleaning, and/or power wash.

1.02 Basic Scope of Work – Option B- 60mil TPO Mechanically fastened–20-Year Warranty

- All items stay the same as in 1.01 Option A, except:
 - o ... (same as in 1.01 Option A)
 - o Install one layer of 1" ISO (or ½" HD) over the prepared existing roof, mechanically attached to the existing metal deck using manufacturer-approved fasteners, per manufacturer specification.
 - o ... (same as in 1.01 Option A)

- o Install a 60 Mil TPO membrane over the new 1" ISO (or ½" HD), mechanically attached to the existing metal deck using manufacturer-approved fasteners, per manufacturer recommendation and specification.
- o ... (same as in 1.01 Option A)

1.03 Alternates (Options)

- 20-yr contractor's workmanship warranty, delta 18 years.

1.04 Unit Price Alternates

- Replace skylight with burglar bars. Replace bad curbs if needed. New skylight must meet wind uplift requirements provided by engineer, or at least -32 psf
- Sq. ft. cost on scrape, prime and paint, roof deck
- Replace wet insulation
- Replace roof deck metal
- Annual PMP
- Biannual PMP (each time)

1.05 Work by others

- ACM testing and report
- HVAC survey and report

1.06 Staging and Set Up:

- Conduct a pre-job meeting to discuss job scheduling, safety requirements, and job site logistics.
- Submit all submittals including cutsheets, drawings and procedures.
- Submit contact information sheet.
- Submit schedule
- Submit phasing and sequencing plan
- Submit staging plan
- Coordinate with property manager and tenants on phasing and sequencing, staging, storage and material deliveries.
- Coordinate with tenants on interior protection on major equipment in tenant's space. Coordination with tenants and watch from underneath during fastening process. Clean up debris in tenant's space due to mechanical fastening.
- Apply for and receive all mandatory building permits required by state and city.
- Flag and cone off roof perimeter, fall locations, skylights, crane loading area(s), staging perimeter, and dumpster locations.
- Place dumpsters, dumpster chutes, and porta potties in designated areas.
- Install all the proper safety requirements for the job. This will include roof perimeter flag lines, Raptor fall restraint boxes, and safety stands with cattle rails as required by O.S.H.A.

- 1.07 The Contractor is required to adequately document all phases of the project for the property's records. The list below indicates what the Contractor's final turnover is to include. The standard packaging of these materials is to be three copies in an indexed binder format:
- Submittals
 - Punch Lists and Sign-Off(s)
 - Copies of all Lien Releases- final unconditional lien waiver
 - Workmanship Warranty- 2 years, alternate to match 20 years
 - Final detail pictures
 - Final drone pictures
 - Final report
 - Any other such materials as necessary
- 1.08 The winning bidder will be responsible for maintaining the roof free of leaks until the start of the work. It is not the intent of the work maintenance to be excessive but to stabilize the conditions until the project commences.
- 1.09 Bidders shall examine the pre-existing conditions, report back to the owner and suggest necessary revision of the roof condition and scope of work in this RFP.
- 1.10 All bidders must retain an active contractor license issued by the State of Minnesota and provide a copy of current license with Bid.
- 1.11 Contractor shall exercise due care to prevent any damage to the Property, whether intentional or unintentional, including, without limitation, damage to parking lot paving, the building envelope, and any mechanical, electrical, or plumbing (MEP) systems. Any damage to the Property caused by the Contractor, its subcontractors, agents, or employees shall be the sole responsibility of the Contractor and shall be promptly repaired or, at the Owner's election, reimbursed to the Owner at the Contractor's sole cost and expense.
- 1.12 Contractor will be required to provide a site logistics plan for material laydown, temporary facilities, parking requirements and any other information that is required to ensure that the on-site management and tenants are well informed of the daily operations of the Project. The winning Contractor will become a part of the Project Team will work with the team to complete design, final budgeting, value engineering, scheduling, temporary facilities, site logistics, etc
- 1.13 For quality assurance and warranty effectiveness, it is recommended and encouraged to procure material parts from a **single source manufacturer**. Manufacturer shall be GAF, Johns Manville, Firestone, Versico, Carlisle, or approved equal.
- 1.14 Bidders shall provide detailed unit material price in the proposal. The winning bidder is responsible for monitoring material price changes and provide updated unit price at the time material is shipped.
- 1.15 An asbestos survey will be conducted to determine whether the building has any asbestos-containing material (ACM) prior to the start of any work.
- 1.16 Contact information for HVAC, Plumbing, Electrical and Fire Alarm will be provided if needed for coordination. Owner will request contractor to pick off and dispose of old abandoned HVAC safe of by others.

A pre-bid walk-through at the property is provisionally scheduled for Schedule with MMG. To ensure qualification, all bidders are required to attend this meeting.

Proposals are to be received at Maverick Management Group no later than **March 30, 2026, 3:00 PM**
Emailed assembled or scanned copies of all forms in the requirements in PDF form are acceptable.

Proposals shall be addressed as follows:

PART 2 - EXECUTION

2.01 General

- A. All applicable code requirements must be met for roof replacement work.
- B. Remove vegetation, improvements, or obstructions interfering with use of available set up locations. Replace to match existing at completion of Work. Coordinate all Work with the Owner, Agent, Consultant, Architect and Engineer. Protection of and replacement due to damage to landscaping, shrubbery, trees, exterior lighting, underground sprinkler, or fire systems shall be contractors responsibility and shall be repaired/replaced at contractors expense.
- C. Provide all tenant protection and clean-up as needed.
- D. All roofing substrates specified to be prepared and/or cleaned shall be prepared/cleaned in accordance with the methods and procedures specified and recommended by the specified roofing material manufacturer.
- E. Should Work performed by Contractor be found faulty and not in accordance with the specifications through inspections by the Manufacture, Owner, Agent, Consultant, Architect or Engineer, faulty work shall be the removed and replaced at the cost of the contractor.
- F. During the course of Work, the Contractor shall carefully examine the grounds around the building receiving Work at the end of each day. All debris including the smallest pieces of membrane asphalt, or metal shall be cleaned and removed from the site.
- G. Smoking is not permitted at the work site.
- H. During bidding, roofing contractors are invited and encouraged to verify existing conditions and existing roofing materials. Coordinate schedule with Owner, Agent, Consultant, Architect and Engineer and make professional non-leak roofing repairs at core locations.
- I. Contractor shall identify all areas of work excluded from scope as it is the intent of contractors bid to include all work necessary to complete all related roof work in accordance with manufacturer guidelines.
- J. The winning bidder will be responsible to maintain the roof free of leaks until the start of the work. It is not the intent of the work maintenance to be excessive but to stabilize the conditions until the project commences.

K. Project Preparation:

1. Perform a pre-job meeting to determine jobsite logistics and safety requirements.
2. Furnish proposed construction schedule.
3. Furnish phasing and sequencing plan
4. Furnish staging plan
5. Furnish and install temporary rooftop chute or crane assembly for debris removal.
6. Contractor is to designate a site safety person and is to submit a site safety plan a minimum of 1 week prior to commencement of work.
7. Furnish and install proper safety equipment.
8. Furnish and install warning lines to identified areas associated with ground related roofing activities.
9. Store roofing materials in accordance with good roofing practices. Material placement will be to distribute weight loads throughout the entire roof area.

L. Surface Preparation

1. Refer to manufacturer's specifications

M. System Application

1. Refer to manufacturer's specifications

N. Miscellaneous

1. Paint all gas lines safety yellow
2. Install OMG pipe guards or similar to all existing condensation, electrical and gas lines. Contractor to confirm the height of the existing lines to choose the size of pipe guard accordingly.
3. Furnish and install Walkway.
4. Repair or replace gutters downspouts (If applicable)
5. Furnish and install new dome skylights with fall protection screens on the existing curbs. Replace bad curbs if needed. Final number to be verified. (If applicable)
6. Detail expansion joint, molded boots and field wraps. (If applicable)

- O. Contractor shall be aware of MEP equipment and lines on the roof. During the roofing work, Contractor shall protect MEP equipment, and protect and support MEP lines such as conduits, pipes, tubes, gas lines and electrical lines with OMG Pipeguard furnished and installed by the contractor. The owner will provide MEP contractors with whom the work is to be coordinated.

2.02 Standard Operating Procedure

A. Employee Professionalism

All work shall be performed in a safe, professional manner in compliance with OSHA, national, state and local codes. Smoking is not permitted at the site at any time.

- B. Permits
The contractor shall supply the necessary permits for the project. And provide copies of all inspections.
- C. Nightly Tie-Ins
Depending on new roof system being installed, temporary water cut-offs are to be constructed at the end of each working day to protect the newly installed roof system and building interior. Contractor will be responsible for all repairs at their own cost for any damages as a result of any improper nightly tie ins.
- D. Clean Up
All work premises will be cleaned daily during the construction process and at the completion of the project.
- E. Job Acceptance and Punch List
Conduct a post job walk through for final sign-off of our job completion form.
- F. Warranty
Include 20-year manufacturer labor and material warranty. Include 2-year contractor workmanship warranty. An alternate to extend the workmanship warranty to match up duration of manufacturer warranty. Provide annual PMP and biannual PMP as alternates. Upon purchase of the roofing system, the owner becomes entitled to receive the benefits of single source responsibility through the bidder's comprehensive written warranty. This warranty protects the owner's roof against defects in materials or workmanship. If the roof leaks at any time during the warranty period, the bidder will provide complete warranty service.
- The warranty shall be transferable at no cost to current owner.
 - Identify the Preventative Maintenance Program (PMP) at cost to maintain during the warranty period as an alternate price.
 - Include 20-year manufacturer labor and material No Dollar Limit (NDL) warranty.
 - Include 2-year contractor workmanship warranty. An alternate to extend the workmanship warranty to match up duration of manufacturer warranty
- G. Meeting and Report
The Contractor shall conduct daily POT (plan of today in the morning and plan of tomorrow in the afternoon) calls, daily construction reports, weekly conference calls, agenda, meeting minutes, 2-week look ahead and construction schedule to be discussed on a weekly basis.

2.03 Product. Acceptable Manufacturers:

- A. GAF
- B. Versico
- C. Carlisle
- D. Johns Manville
- E. Firestone
- F. or approved equal

2.04 Traffic Protection

- A. In high-traffic areas and around mechanical equipment, walkways should be installed to protect the new system from damage.

2.05 Roof Protection

- A. Protect all partially and fully completed roofing work from other trades until completion.
- B. Whenever possible, stage materials in such a manner that foot traffic is minimized over completed roof areas.
- C. When it is not possible to stage materials away from locations where partial or complete installation has taken place, temporary walkways and platforms shall be installed in order to protect all completed roof areas from traffic and point loading during the application process.
- D. Temporary tie-ins shall be installed at the end of each workday and removed prior to commencement of work the following day.

2.06 Clean-Up

- A. All work areas are to be kept clean, clear and free of debris at all times.
- B. Do not allow trash, waste, or debris to collect on the roof. These items shall be removed from the roof on a daily basis.
- C. All tools and unused materials must be collected at the end of each workday and stored properly off of the finished roof surface and protected from exposure to the elements.
- D. Dispose of or recycle all trash and excess material in a manner conforming to current EPA regulations and state and local laws.

- E. Properly clean the finished roof surface after completion, and make sure the drains and gutters are not clogged. All boot marks, scuff marks and dirt related to construction will be removed in order to provide a clean reflective surface.
- F. Clean and restore all damaged surfaces to their original condition.

PART 3 - CONTRACTOR'S RESPONSIBILITIES

The Owner and Contractor may agree, in consultation with the Owner, Agent, Consultant, Architect and Engineer, for the Construction Phase to commence prior to completion of the Preconstruction Phase, in which case, both phases will proceed concurrently. The Contractor shall identify a representative authorized to act on behalf of the Contractor with respect to the Project.

The Contractor will be required to hold a contractors' license (or applicable license) valid for the State of Minnesota.

3.01 Preconstruction Phase

A. Consultation

The Contractor shall meet with the Owner, Agent, Consultant, Architect and Engineer to discuss such matters as procedures, progress, coordination, and scheduling of the work. The Contractor shall advise the Owner, Agent, Consultant, Architect and Engineer on proposed site use and improvements, selection of materials, and building systems and equipment. The Contractor shall also provide recommendations consistent with the Project requirements to the Owner, Agent, Consultant, Architect and Engineer on constructability; availability of materials and labor; time requirements for procurement, installation and construction; and factors related to construction cost including, but not limited to: costs of alternative designs or materials, preliminary budgets, life-cycle data, and possible cost reductions.

The Contractor shall provide recommendations with regard to accelerated or fast-track scheduling, procurement, or phased construction. The Contractor shall take into consideration cost reductions, cost information, constructability, provisions for temporary facilities and procurement and construction scheduling issues.

B. Preliminary Cost Estimates

As the Owner, Agent, Consultant, Architect and Engineer progress with the preparation of the Design Documents, the Contractor shall prepare estimates of the Cost of the Work of increasing detail and refinement and allowing for the further development of the design until such time as the Owner and Contractor agree on a Guaranteed Maximum Price for the Work. Such estimates shall be provided for the Owner, Agent, Consultant, Architect and Engineer's review and approval prior to the completion of each phase. The Contractor shall inform the Owner, Agent, Consultant,

Architect and Engineer when estimates of the Cost of the Work exceed the latest approved Project budget and make recommendations for corrective action.

C. Guaranteed Maximum Price Proposal and Contract Time

At a time to be mutually agreed upon by the Owner and the Contractor and in consultation with the Owner, Agent, Consultant, Architect and Engineer shall prepare a detailed line item Guaranteed Maximum Price Proposal for the Owner's review and acceptance.

The Contractor shall include with the Guaranteed Maximum Price proposal a written statement of its basis, which shall include the following, as applicable:

- a. A list of the Drawings and Specifications, including all Addenda thereto, and the Conditions of the Contract.
- b. A list of the clarifications and assumptions made by the Contractor in the preparation of the Guaranteed Maximum Price proposal.
- c. A statement of the proposed Guaranteed Maximum Price, including a statement of the estimated Cost of the Work organized by trade categories or systems, allowances, contingency, and the Contractor's Fee; See attached bid breakdown sheet.
- d. A schedule of milestones for the completion and the anticipated date of Substantial Completion upon which the proposed Guaranteed Maximum Price is based.
- e. A Schedule of Value for each component of work to be undertaken; and
- f. A date by which the Owner must accept the Guaranteed Maximum Price.

The Contractor shall meet with the Owner, Agent, Consultant, Architect and Engineer to review the Guaranteed Maximum Price proposal. Once a Guaranteed Maximum Price has been agreed upon by all parties, the Owner and Contractor shall execute the Guaranteed Maximum Price Amendment to the Contract. The Guaranteed Maximum Price Amendment shall set forth the agreed upon Guaranteed Maximum Price with the information and assumptions upon which it is based and shall include a Schedule of Values. The Contractor shall guarantee that the Contract Sum shall not exceed the Guaranteed Maximum Price set forth in the Guaranteed Maximum Price Amendment, as it is amended from time to time. To the extent the Cost of the Work exceeds the Guaranteed Maximum Price, the Contractor shall bear such costs in excess of the Guaranteed Maximum Price without reimbursement or additional compensation from the Owner. The Contractor will acknowledge that the Contractor is an experienced contractor and that (subject to Acts of God) the Project can be completed for Guaranteed Maximum Price.

D. Subcontractors and Suppliers

Those portions of the Work that the Contractor does not customarily perform with the Contractor's own personnel shall be performed under subcontracts or by other appropriate agreements with the Contractor. The Owner may designate specific

persons from whom, or entities from which, the Contractor shall obtain bids. Subcontractors must be located 50 miles or less from the Project site, unless a greater distance is approved by the Owner. The Contractor shall obtain at least three proposals from Subcontractors and from suppliers of materials or equipment fabricated especially for the Work and shall deliver such proposals to the Owner. The Owner shall then determine, with the advice of the Agent, Consultant, Architect and Engineer, which bids will be accepted.

If the Guaranteed Maximum Price has been established and a specific subcontractor or supplier (1) is recommended to the Owner by the Contractor, (2) is qualified to perform that portion of the Work, and (3) has submitted a proposal that conforms to the requirements of the Contract Documents without reservations or exceptions, but the Owner requires that another proposal be accepted, then the Contractor may require that a Change Order be issued to adjust the Guaranteed Maximum Price by the difference between the bid of the person or entity recommended to the Owner by the Contractor and the proposal of the person or entity designated by the Owner.

3.02 Construction Phase

The Construction Phase shall commence upon the execution of the Guaranteed Maximum Price Amendment or the Owner's issuance of a Notice to Proceed, whichever occurs earlier.

A. Changes in the Work

The Owner may, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions, or other revisions. The Owner, Agent, Consultant, Architect and Engineer shall issue such changes in writing and all change orders will be signed and acknowledged by Owner and Contractor. The Contractor shall be entitled to an equitable adjustment in the Contract Time as a result of changes in the Work.

Change orders issued by the Owner, Agent, Consultant, Architect and Engineer subsequent to the execution of the Guaranteed Maximum Price Amendment shall constitute adjustments to the Guaranteed Maximum Price.

B. Administration

Upon the execution of the Guaranteed Maximum Price Amendment, the Contractor shall prepare and submit to the Owner, Agent, Consultant, Architect and Engineer a construction schedule for the Work. The Contractor shall update the Owner in writing on the progress of the Project on a monthly basis indicating the percentages of completion and other information required by the Owner.

The Contractor shall develop a system of cost control for the Work, including regular monitoring of actual costs for activities in progress (compared to the Schedule of

Values) and estimates for uncompleted tasks and proposed changes. The Contractor shall identify variances between actual and estimated costs and report the variances to the Owner, Agent, Consultant, Architect and Engineer and shall provide this information in its monthly reports to the Owner, Agent, Consultant, Architect and Engineer.

The Contractor shall comply with applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to its performance under this Contract, and with equal employment opportunity programs, and other programs as may be required by governmental and quasi- governmental authorities for inclusion in the Contract Documents.

PART 4 - OWNER'S RESPONSIBILITIES

- 4.01 Owner, Agent, Consultant, Architect and Engineer
The Owner shall retain Agent, Consultant, Architect and Engineer to provide Program Verification, Criteria Design, Detailed Design, and Implementation Documents related to the Project. Agent, Consultant, Architect and Engineer fees will be the responsibility of the Owner and not included in the Guaranteed Maximum Price.
- 4.02 Environmental Tests, Surveys and Reports
The Owner shall be responsible for costs related to environmental studies, survey of existing conditions, and structural integrity condition services related to the Project. The owner will provide contractor, ACM survey and testing report. The Owner shall make all studies, survey data, and results available to the Contractor.
- 4.03 Owner's Designated Representative
The Owner has engaged an Owner's Representative to assist Owner in decision making. When the Owner is required to act, any such action will be undertaken by the Owner's authorized representative with advice from the Owner's Representative. The Owner's representative shall render decisions promptly and furnish information expeditiously, so as to avoid unreasonable delay in the services or Work of the Contractor.
- 4.04 Others
NOT USED.

PART 5 - QUALITY ASSURANCE

- 5.01 Manufacturer's Qualifications: The installation contractor shall provide a roofing system that meets or exceeds all criteria listed in this section.

- 5.02 Installer's Qualifications: Installer shall be classified as an Authorized contractor as defined and certified by the manufacturer of the roof membrane and all sub systems supporting the installation of the roof system.
- 5.03 If hazardous materials are noted within the Owners NESHAPS testing documentation, the installation contractors shall provide licensed, familiar with and qualified workmen to conduct the work on the hazardous materials identified.
- 5.04 The roofing contractor shall be thoroughly experienced and upon request be able to provide evidence of having at least five (5) years successful experience installing roof coating system and having installed at least ten (10) roofing application or several similar systems of equal or greater size within one year.
- 5.05 There shall be no deviations made from this specification or any approved shop drawings without the prior written approval of the Owner, Agent, Consultant, Architect and Engineer. Any deviation from the warrantor's/manufacture's installation procedures must be supported by a written certification on the warrantor's/manufacture's letterhead and presented for consideration by Owner, Agent, Consultant, Architect and Engineer.
- 5.06 Provide adequate number of experienced workmen regularly engaged in the application of the manufacturers products who are skilled in the application techniques of the materials specified. Provide at least one thoroughly trained and experienced Superintendent / Foreman on the job at all times roofing work is in progress. All personnel working on the site for the contractor shall be direct employees of the contractor who have worked for the contractor for a minimum of three years. Specialty subcontractors may be used for conducting work not normally conducted by the contractor in the normal course of roofing work, on approval by the Owner, Agent, Consultant, Architect and Engineer.
- 5.07 Initial Quality Insurance Inspection: Upon completion of the initial 1000 square feet of roofing installation, coordinate an initial quality control inspection. The contractor shall arrange for an inspection to be made by a non-sales technical representative of the roof system manufacturer in order to determine whether or not initial work meets the requirements for the specified warranty to be issued. The installation contractor shall notify the Owner, Agent, Consultant, Architect and Engineer seventy-two (72) hours prior to the initial inspection.

- 5.08 Final Quality Insurance Inspection: Upon completion of the installation, the contractor shall arrange for an inspection to be made by a non-sales technical representative of the roof system manufacturer in order to determine whether or not corrective work will be required before the warranty will be issued. Notify the Owner, Agent, Consultant, Architect and Engineer seventy-two (72) hours minimum, prior to the final inspection. All application errors must be addressed, and final punch list completed. No "early release" warranties will be accepted.

PART 6 - INSURANCE AND BONDS

For all phases of the Project, the Roofing Contractor shall purchase and maintain the insurance required by the Owner and to be set forth in the Construction Contract. The selected proposer, upon the signing of the formal contract, will be required to deliver an insurance certificate in amounts, companies, and terms acceptable to the Risk Manager of the Owner and the owners representative.

The contract requires liability coverage of \$5,000,000.00 plus 2 years extension of completed operation with plus 3 years as alternate; Workmen's' Compensation: Statutory; Disability: Statutory

PART 7 - INDEPENDENT PROJECT COST DETERMINATION AND GRATUITIES

By submission of an offer, the proposer certifies, that in connection with this proposal:

- 7.01 The costs in this offer have been arrived at independently, without consultation, communication or agreement, for the purposes of restricting competition, as to any matter relating to such prices with any other proposer or competitor.
- 7.02 The prices quoted in this offer will not change for a period of sixty (60) days after the receipt date at the owner of this offer.
- 7.03 Unless otherwise required by law, the costs which have been quoted in this offer have not been knowingly disclosed by proposer and will not knowingly be disclosed by the proposer prior to award, directly or indirectly to any other proposer or to any competitor.
- 7.04 No attempt has been made or will be made by the proposer to induce any other person or firm to submit or not to submit an offer for the purpose of restrictive competition.
- 7.05 No official or employee of the owner or the property management shall benefit financially or materially from any contract awarded pursuant to this RFP.

PART 8 - GENERAL CONDITIONS

- 8.01 Use Of the Premises

- A. Before beginning work, the roofing contractor must secure approval from Owner, Agent, Consultant, Architect and Engineer for the following:
 - 1. Access to the site.
 - 2. Areas permitted for personnel parking.
 - 3. Areas permitted for storage of materials and debris.
 - 4. Areas permitted for the location of cranes, hoists and chutes for loading and unloading materials to and from the roof.
 - 5. Access areas to and placement of a waste dumpster.
- B. Interior stairs or elevators may not be used for removing debris or delivering materials, except as authorized by the Owner, Agent, Consultant, Architect and Engineer. If authorization is given, contractor shall be responsible to ensure the area is kept clean and in good repair.

8.02 Existing Conditions

If discrepancies are discovered between the existing conditions and those necessary to provide the specified roof system and warranty, immediately notify the Owner, Agent, Consultant, Architect and Engineer and solicit the warrantor's/manufacture's approval prior to commencing with the work. Necessary steps shall be taken to make the building watertight until the discrepancies are resolved.

- A. The contractor shall conduct one pull test for every 5000 Square Feet of roof area in order to verify the suitability of the substrate to meet the performance standards required by the roof system.
- B. The contractor shall conduct a dew point calculation in order to verify the appropriateness of the installation of a vapor retarder.
- C. The contractor shall inspect the deck from the ceiling cavity to familiarize the contractor's staff with the location of underside of deck mounted equipment, such as conduits, junction boxes, piping and HVAC equipment. Care should be taken to avoid penetration of deck mounted equipment.
- D. The contractor shall note the potential for sifting of demolition materials into the building envelope and where the potential exists, the contractor shall exercise caution to minimize the effects of sifting into the building envelope. Care should be taken to avoid penetration of deck mounted equipment.
- E. Contractor to ensure existing roofing is NESHAP tested before any roof demolition or investigative work starts.

8.03 Regulatory Requirements

- A. All work shall be performed in a safe, professional manner, conforming to all federal, state and local laws, codes, ordinance and standards of practice.
- B. Exterior Fire Test Exposure: Provide a roofing system that will achieve an Underwriters Laboratories rating for roof slopes indicated.

8.04 Delivery, Temporary Services, Storage and Handling

- A. Deliver all roofing materials to the site in original containers, with factory seals intact.
- B. Handle all materials to prevent damage. Place all materials on pallets and fully protect from moisture. All materials stored on site shall be secured in a manner to prevent wind blow off and damage to the existing roof and roof mounted equipment.
- C. Store roof materials per manufacturer's specifications.
- D. Store all pail goods in their original undamaged containers in a clean, dry location within their specified temperature range.
- E. Do not expose materials to moisture in any form before, during, or after delivery to the site. Reject delivery of materials that show evidence of contact with moisture. Materials stored on site that are determined to be damaged are to be removed from the site and disposed of properly, at no cost to the owner. Damaged materials removed shall be replaced at no cost to the owner.
- F. Remove manufacturer supplied plastic covers from materials provided with such. Use "breathable" type covers such as canvas tarpaulins to allow venting and protection from weather and moisture. Cover and protect materials at the end of each workday. Do not remove any protective tarpaulins until immediately before the material will be installed.
- G. Temporary Utilities:
 - 1. Water, power for construction purposes and lighting may not available.
 - 2. Provide all hoses, valves and connections for water from source designated by the Owner, Agent, Consultant, Architect and Engineer when made available.
 - 3. When available, electrical power should be extended as required from the source. Provide all trailers, connections and fused disconnects.
- H. Temporary Sanitary Facilities
Sanitary facilities will not be available at the job site. The roofing contractor shall be responsible for the provision and maintenance of portable toilets or their equal.

I. Building Site:

The roofing contractor shall use reasonable care and responsibility to protect the building and site against damages. The contractor shall be responsible for the correction of any damage incurred as a result of the performance of the contract.

The roofing contractor shall remove all debris from the job site in a timely and legally acceptable manner so as to not detract from the aesthetics or the functions of the building.

8.05 Project Conditions

A. Weather

Proceed with roofing only when existing and forecasted weather conditions permit. Ambient temperatures must be above 40°F (7.2°C) and rising when applying water-based adhesives.

8.06 Job Site Protection

- A. The roofing contractor shall adequately protect building, paved areas, service drives, lawn, shrubs, trees, etc. from damage while performing the required work. Provide canvas, boards and sheet metal (properly secured) as necessary for protection and remove protection material at completion. The contractor shall repair or be responsible for costs to repair all property damaged during the roofing application.
- B. During the roofing contractor's performance of the work, Tenants will continue to occupy the existing building. The contractor shall take precautions to prevent the spread of dust and debris, particularly where such material may shift into the building. The roofing contractor shall provide labor and materials to construct, maintain and remove necessary temporary enclosures to prevent dust or debris in the construction area(s) from entering the building.
- C. Do not overload any portion of the building, either by use of or placement of equipment, storage of debris, or storage of materials.
- D. Protect against fire and flame spread. Maintain proper and adequate fire extinguishers.
- E. Take precautions to prevent drains from clogging during the roofing application. Remove debris at the completion of each day's work and clean drains, if required. At completion, test drains to ensure the system is free running and drains are watertight. Remove strainers and plug drains in areas where work is in progress. Install flags or other telltales on plugs. Remove plugs each night and screen drain.
- F. The Contractor is responsible for nightly roofing tie ins. All roofing being demoed daily must be tied into newly installed membrane for a complete waterproof seal at the end of every daily work shift.

- G. Store moisture susceptible materials above ground and protect with waterproof coverings.
- H. Remove all traces of piled bulk materials and return the job site to its original condition upon completion of the work.
- I. Arrange work sequence to avoid the use of newly constructed roofing as a walking surface or for equipment movement and storage. Where such access is required, the roof contractor shall provide all necessary protection and barriers to segregate the work area and to prevent damage to adjacent areas. A substantial protection layer consisting of plywood over a slip sheet or plywood over insulation board shall be provided for all new and existing roof areas that receive rooftop traffic during construction.
- J. The contractor shall verify that all roof drain lines are functioning correctly (not clogged or blocked) before starting work. The contractor shall report any such blockages in writing to the Owner, Agent, Consultant, Architect and Engineer for corrective action prior to installation of the roof system.
- K. The contractor shall conduct fastener pullout tests in accordance with the latest revision of the SPRI/ANSI Fastener Pullout Standard to help verify condition of deck/substrate and to confirm expected pullout values.
- L. Precautions shall be taken when using adhesives at or near rooftop vents or air intakes. Coordinate the operation of vents and air intakes in such a manner as to avoid the intake of adhesive odor while ventilating the building. Keep lids on unused cans at all times.

8.07 Safety

The roofing contractor shall be responsible for all means and methods as they relate to safety and shall comply with all applicable building owners, local, state and federal requirements that are safety related. Safety shall be the responsibility of the roofing contractor. All personnel shall be instructed daily to be mindful of the full-time requirement to maintain a safe environment for the facility's occupants including staff, visitors, customers as well as themselves and the occurrence of the general public on or near the site.

- A. Protective wear shall be worn when using solvents or adhesives or as required by job conditions.
- B. Flammable adhesives and deck primers shall not be stored and not be used in the vicinity of open flames, sparks and excessive heat.

- C. Membranes are slippery when wet or covered with snow, frost, or ice. Working on surfaces under these conditions is hazardous. Appropriate safety measures must be implemented prior to working on such surfaces.
- D. The existing roof may contain asbestos containing materials.
- E. OSHA and other relevant fall protection standards shall be strictly adhered to.
- F. At the commencement of the work, and daily thereafter, the Contractor shall conduct a safety meeting with the Contractor's employees. The Contractor will provide, at least weekly, a written safety report identifying the employee attendance at each daily safety meeting, a report of any and all safety related incidents or issues to the building manager. All injuries, regardless of the nature of the injury shall be reported to the Owner, Agent, Consultant, Architect and Engineer.

PART 9 - GENERAL INSTRUCTIONS & REQUIREMENTS

- 9.01 By submitting a bid, the Contractor represents that he has thoroughly reviewed all construction documentation and has visited the site and is familiar with the sites existing conditions and details applicable to all work required under this contract.
- 9.02 Contractor shall obtain all necessary local, state, and federal permits and/or city mandated business licenses, and shall comply fully with all ordinances, regulations and statutes. If a specific trade permit is required, it will be the responsibility of the Contractor and/or his sub-contractor to file the necessary documentation for this permit, provide any corrections and remit any and all funds necessary for the issuance of such a permit.
- 9.03 Contractor is to provide a breakdown of those items inclusive of general conditions in the bid amount.
- 9.04 The Owner reserves the right to accept or reject any and all bids pertaining to this project.
- 9.05 Contractor is to provide a listing, with detailed contact information, of subcontractors, lower tier subcontractors and vendors for this project.
- 9.06 Contractor is required to provide on-site supervision during the entire construction process.
- 9.07 The contractor is responsible for providing appropriate storage containers for construction materials as well as trash dumpsters and shall confine storage of material and trash disposal to those designated areas. These are to be included within contractor's bid.

- 9.08 Contractor is to provide, as a supplement to the application for payment, partial lien waivers and full and final lien waivers for ALL vendors, sub-contractors and any other lower tier subcontractors vendors and suppliers who have carried out work or provided goods or services to the property pursuant to the overall scope of this project.
- 9.09 The Contractor will remove any item that the contractor has applied that requires scraping to remove and shall prepare the work per manufacturer instructions. The Contractor will clean up all areas prior to releasing back to the property. Contractor is to take all necessary steps to protect areas and equipment not in the scope of work.
- 9.10 At no time is any of the property's equipment to be used.
- 9.11 Owner is responsible for removing, protecting, storing and re-installing any applicable signage, unless otherwise noted. Contractor shall be present.
- 9.12 Contractor is responsible for coordination and safe off of all HVAC units, fire alarms, smoke detectors, sprinklers etc. required to complete the scope of work. DO NOT PAINT OR DAMAGE SPRINKLER HEADS OR FIRE SYSTEM EQUIPMENT. ANY DAMAGE OR COST OF REPLACEMENT WILL BE SOLELY THE RESPONSIBILITY OF THE CONTRACTOR.
- 9.13 Contractor is responsible to start-up and test any MEP system that is turned off to complete this scope of work.
- 9.14 Contractor is responsible for all fire watch if required as a result of this scope of work.
- 9.15 Contractor is responsible for submitting in a timely manner all required submittals to the owners team for approval. This includes any unspecified fit and finish components provided by contractor.
- 9.16 Contractor is responsible to advise Owner of any compatibility, adhesion or other issues that directly relate to the performance of materials specified in the construction documentation.
- 9.17 Security of all owner-provided construction materials is the responsibility of the Contractor. Any loss or damage done to contractor or owner-provided construction materials during construction is the responsibility of the Contractor.
- 9.18 Accommodations will not be provided for contractor or subcontractors.
- 9.19 Completion of an owner punch list, to the owner satisfaction, is required prior to approval of all progress payments. Areas with outstanding punch list items will not be considered complete and will not be approved for payment

- 9.20 The property will be in operation during the renovation. Contractor activities, which generate excessive noise, are to be coordinated with the property to insure minimal impact on the property tenant and staff.
- 9.21 Radios are not permitted. Smoking is not permitted.
- 9.22 Contractor is responsible for securing the work area with temporary barriers and signage that inhibits tenants and unauthorized property staff from inadvertently wandering into the work area. Contractor is to develop and present a plan depicting the location and type of construction barriers prior to commencement of construction.
- 9.23 Contractor is to designate a site safety person and is to submit a site safety plan a minimum of 1 week prior to commencement of work.
- 9.24 It is the Contractor's responsibility to assure that all adjoining areas that are not part of this project are masked or protected from damage by construction activities.
- 9.25 Fire exits are never to be blocked by contractor's tools, equipment or product. No egress is ever to be impeded. Any such blocked egress shall be construed as gross negligence on the part of the Contractor.
- 9.26 Delivery trucks are to deliver to the area designated as the loading dock and must be scheduled 24 hours in advance to coordinate with the property deliveries. Deliveries must be off-loaded immediately and it is the contractor's responsibility to adequately staff for this task.
- 9.27 All hazardous materials used by the Contractor in the performance of his work are to be sealed and stored properly when not in use at Contractor's own expense.
- 9.28 Contractor to provide appropriate MSDS sheets to property Owner, Agent, Consultant, Architect and Engineer with a copy to MMG for all materials introduced or brought on site for project application.
- 9.29 Construction workers will not be housed on the premises. The coordination and burden of housing will be that of the Contractor and will be included in the Contractor's bid.
- 9.30 Construction workers will not use any of the property facilities. A designated break area for the construction crew will be determined prior to construction. Contractor/subs are responsible for keeping this area clean at all times.
- 9.31 Workers will not utilize public telephones or restrooms. Contractor to provide temporary facilities for construction personnel.
- 9.32 Smoking is never allowed in construction areas and anywhere in the property anytime.

- 9.33 Food and beverages are not allowed in the work areas. Designated break area will be assigned. Anyone found with food or beverages in the construction area will be asked to leave the job site.
- 9.34 The construction workers will wear acceptable pants, shirts, OSHA approved work boots and PPE at all times whenever they are working. Clean contractor "logo" shirts are required with no holes or cut-offs and clean pants with no holes. No clothing with offensive slogans or images will be permitted.
- 9.35 Construction workers are to conduct themselves in a professional and appropriate manner at all times. Any inappropriate language, harassment, or inappropriate comments to tenants or property associates will not be tolerated.
- 9.36 No radios, boom boxes, etc. may be brought into the property and played in the work area. Anyone found with radios, boom boxes, etc. will have it confiscated and not returned to them until the project is completed or until their services are completed.
- 9.37 Construction workers are to direct their communication to the Contractors project superintendent ONLY.
- 9.38 Any contractual disagreements are to be directed to the Contractors project superintendent, Owner, Agent, Consultant, Architect and Engineer, **NOT WITH ANY PROPERTY ASSOCIATE.**
- 9.39 All Contractors and Subcontractors shall adhere to safety procedures including, but not limited to, requiring all workers to wear hard hats, safety glasses, work boots and proper clothing at all times when on the jobsite.
- 9.40 Contractor is to comply with all OSHA standards and requirements.
- 9.41 Contractor shall hold weekly safety meetings and provide reports of the topics discussed to the Owner.
- 9.42 Contractor shall be responsible for miscellaneous flagging and traffic control during the items when specifically required for their operation. It is the Contractor's responsibility to provide competent flag persons and adequate safety devices to protect the public during all of their operations.
- 9.43 Contractor shall supply to the Owner a complete accident report on any job injury to any of their employees within 24 hours of such occurrence. Contractor's safety director and/or a principal of the company shall meet with the Owner within 48 hours of accident to review the accident report and to discuss measures to be taken to prevent further occurrences. OSHA will be involved as required per occurrence.

- 9.44 Contractor shall be responsible for and shall indemnify and defend Owner, Agent, Consultant, Architect and Engineer against any fines, penalties or damages to Owner by the Occupational Safety and Health Administration or any similar state or local agency relating to or arising from the Contractor's work. Unless such fines, penalties or damages are contested by mutual agreement of the Owner, Agent, Consultant, Architect and Engineer and Contractor at Contractor's sole expense, such fines, penalties or damages shall be deducted from amount due Contractor hereunder and in the event no further amounts are due Contractor hereunder when such fines are assessed, upon demand by the Owner, Agent, Consultant, Architect and Engineer, Contractor shall promptly pay such fines to the Owner, Agent, Consultant, Architect and Engineer prior to the time such fines are due and payable to the assessing agency.
- 9.45 All Contractors shall have in place a written, organized and effective safety program. This program must be submitted prior to commencement of work and shall be available onsite at all times. All MSDS will be submitted to onsite Project Superintendent for the "Right to Know" station.

PART 10 - PUNCH-LIST AND CLOSE-OUT

- 10.01 The pre-requisite for the punch process will be that the Contractor has already inspected his work at least once and that it is actually ready for a "final punch". This final punch will proceed if upon inspection, the project manager (or designated punch team lead) agrees that it is ready to punch. If it is determined by the project manager that the area is not "punchable" due to numerous items, then the Contractor will need to re-schedule the punch at such time that the area is deemed ready.
- 10.02 The property punch team will consist of the owners project manager, appropriate property personnel and the Contractor's superintendent.
- 10.03 The Contractor should have representatives from any and all trades as required to complete punch items on the spot or at the latest by the end of the day.
- 10.04 The punch team will complete a "punch list" for each area, which details all of the various defects. This list will be posted on each area or given to the superintendent for the Contractor's team to use as a reference. The project manager will keep the original copy of the punch list for using in the "signing off inspection" later in the day. Contractors and subcontractors shall provide written sign-off prior to the project manager or property representative verifying completion of the items.
- 10.05 When the Contractor considers that the work is "substantially complete" they must submit a request for "final inspection" to the project manager. If the project manager finds that the work progress is indeed sufficient, a "Certificate of Substantial Completion" with a list of any outstanding punch list or correction items is to be issued to the Contractor.

- 10.06 When all items listed on the certificate are completed or corrected, the contractor shall send to the project manager a request for final inspection indicating they deem the project to be 100% complete. If the project manager is in agreement, a final Certificate of Payment is issued and all “retainage” is paid to the Contractor. It is understood by both parties that the “Warranty Period” commences only when all punch list items are completed.
- 10.07 Contractor is required to train property staff on the use of equipment if applicable and is to provide written instructions.
- 10.08 The Contractor is required to adequately document all phases of the project for the property’s records. The list below indicates what the Contractor’s final turnover is to include. The standard packaging of these materials is to be three copies in an indexed binder format:
- Submittals
 - Punch Lists and Sign-Off(s)
 - Copies of all Lien Releases- final unconditional lien waiver
 - Copies of all final unconditional lien waivers from subcontractors and distributors
 - Workmanship Warranty- 2 years
 - Final detail pictures
 - Final drone pictures
 - Final report
 - As-built
 - Any other such materials as necessary

EXHIBIT B - BID FORM

Project: [6820 Shingle Creek Pkwy, Minneapolis, MN 55430]
Bid To: [Maverick Management Group, LLC]

1. The undersigned bidder agrees, if this bid is accepted, to enter into an agreement with Owner, in the form included in the bidding documents, to perform and furnish the work as specified or indicated in the bidding documents for the bid price and within the bid times indicated in this bid and in accordance with the other terms and conditions of the contract documents.

2. In submitting this bid, the bidder represents, as more fully set forth in the Agreement, that:

- This bid will remain subject to acceptance for 60 days after the day of bid opening.
- The Owner has the right to reject this bid.
- Bidder will sign and submit the Agreement at time of signing of Agreement.
- Bidder has examined copies of all bidding documents.
- Bidder has visited the site and become familiar with the general, local and site conditions.
- Bidder is familiar with federal, state and local laws and regulations.
- This bid is genuine and not made in the interest of or on the behalf of an undisclosed person, firm or corporation and is not submitted in conformity with an agreement or rules of a group, association, organization, or corporation. Bidder has not directly or indirectly induced or solicited another bidder to submit a false or sham bid; bidder has not solicited or induced a person, firm or corporation to refrain from bidding; and bidder has not sought by collusion to obtain for itself an advantage over another bidder or over Owner.

3. Bidder will complete the work in accordance with the contract documents for the following price(s):

STIPULATED SUM BID PRICE:

Base Bid – Option A - 20-year 60mil TPO RhinoBond
_____ (\$ _____)
(Written) (Number)

Base Bid – Option B - 20-year 60mil TPO Mechanically Fastened
_____ (\$ _____)
(Written) (Number)

4. Bidder agrees that the work will be substantially complete and ready for final payment in accordance with the General and Supplemental Conditions on or before the dates indicated in the Agreement.

EXHIBIT D – HOLD HARMLESS AGREEMENT

INDEMNIFY HOLD HARMLESS AGREEMENT

_____, hereinafter referred to as Contractor, its agents, employees and representatives, shall indemnify and hold harmless to [GKI Industrial Minneapolis, LLC], its parent company its subsidiaries and related entities and their officers, directors, employees, agents and representatives, Owner, Capital Partners, Investcorp International Realty, Inc and Maverick Management Group, LLC, hereinafter referred to as “[GKI Industrial Minneapolis, LLC] Indemnified Parties”, from all claims, losses, damages, liability, costs, and expenses of any kind or nature (including all costs of defense), resulting directly or indirectly from the work performed by the Contractor, its agents, employees, officers, directors, and representatives, including payment for damages because of injury to the persons or damage or loss to the property employed, owned, leased or managed by Owner, except as follows:

- a. This agreement of indemnity does not cover or include any liability for claims, losses, damages, liability, costs and/or expenses of any kind or nature (or any costs of defense relating thereto) arising directly or indirectly from the actions, obligations, liabilities, negligence, duties, responsibilities or conduct of Owner or any of the [GKI Industrial Minneapolis, LLC] Indemnified Parties (or any combination of Owner and/or any of said respective [GKI Industrial Minneapolis, LLC] Indemnified Parties acting in concert);
- b. This agreement of indemnity does not cover or include any liability for job delays or costs related to delays caused in whole or part by Owner, Acts of God, and/or any other causes beyond Contractor’s direct control, or any loss(es) or damages resulting or arising, in whole or part, from reason(s) within the direct or indirect control of Owner and/or any of the [GKI Industrial Minneapolis, LLC] Indemnified Parties.

Nothing stated herein shall be constructed so as to limit, reduce, waive, compromise or negate Contractor’s right(s) to receive timely payments in accordance with the payment schedule and/or Contractor’s rights relating to the enforcement of same. This specifically includes, but is not limited to Contractor’s rights to file, perfect and enforce liens or encumbrances for the collection of any unpaid amounts under this Agreement as well as Contractor’s right(s) to seek a judgment for Owner’s failure to pay or meet the agreed payment schedule hereunder.”
